EDUCATION

Albert Dorman Honors College at New Jersey Institute of Technology Newark, NJ
Bachelor of Science in Computer Science, Minor in Drones and Robotics (3.97/4.00 GPA) Aug. 2024 – May 2028

Scholarships/Awards: Full Tuition Merit Scholarship, NJIT Community Service Scholar of the Year

Relevant Coursework: AI-Assisted Software Engr, Internet Applications, CodePath (DSA, Web Dev, Applied AI)

EXPERIENCE

Incoming Software Engineer Intern (TDP) May 2026 – Present
AT&T Atlanta, GA

Computer Science Teaching Assistant and Tutor Sep. 2025 – May 2026
New Jersey Institute of Technology Newark, NJ

- Collaborating with course coordinators and university lecturers to implement lab activities for two sections of an Intro to Python class and an Object Oriented Programming class with 60+ combined students
- Delivered targeted, one-on-one tutoring for students across core curriculum courses (CS 100/113/114/280, IT 202), breaking down complex programming concepts and data structures to improve student comprehension

Systems Administrator Intern May 2025 – Aug. 2025
Libra Law Taguig, Philippines

- Deployed a NAS-based document management system (QNAP & Synology) enabling secure local/remote access to 1000+ confidential legal documents spanning 10+ years for a major Philippine law firm
- Designed a role-based access control (RBAC) model with project-specific user groups to speed up file retrieval time by 80% for 30+ lawyers and 14+ clients and provided training to ensure full adoption
- Improved NAS security using 2FA, region-based firewall rules, port restrictions, and full-disk encryption, reducing automated login attempts by over 99%

PROJECTS

Crescendo: Music Discovery and Discussion Platform | *Flask, PostgreSQL, React* Jan. 2026 – May 2026

- Deployed a Flask REST API to AWS Lambda (via Mangum) with a CI/CD pipeline (GitHub Actions) that packages and ships the backend on every merge to main; React + TypeScript frontend served via AWS Amplify, backed by PostgreSQL + SQLAlchemy
- Implemented LLM-powered discussion generation features using the Anthropic API to create context-aware responses from user activity events

HopIt: AI-Powered Platformer Level Builder | *AI Systems & LLMs* April 2026

- Built a pipeline that converts user-drawn sketches into structured JSON level data for procedural platformer generation
- Leveraged Gemini API analysis to evaluate generated levels for playability, difficulty balancing, and layout quality
- Built an iterative feedback system using overhead camera input and LLM-generated recommendations; outcompeted 130+ teams to win **Best Rookie Track** and **Best Use of AI + Hardware** at **HackPrinceton 2026**

SteamPunch: Motion-Detection Controller/Fighting Game | *C++, Arduino, Python* Nov. 2024

- Developed a motion-controlled fighting game in Pygame with a custom Arduino controller
- Winning project in **HackNJIT 2024** (300+ in-person participants nationwide)

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, C++, SQL

Frameworks/Tools: React, Flask, Node.js, PostgreSQL, REST APIs, AWS Lambda, AWS Amplify, GitHub Actions

Additional: Arduino, MATLAB, PHP, NumPy, Pandas

LEADERSHIP AND ACTIVITIES

NJIT-ACM Secretary (HackNJIT 2026 Lead) | **Honors Scholar Council PR Manager** (Honors College Promotion) | **NJIT Robotics Club Volunteering Manager** (Revived K-12 daily STEM mentorship program)
